

**Goal: Prediction of gold price using certain features.**

**How price of gold will be decided?**

This data file is a Comma separated value file format with 2290 rows and 7 columns. It contains 5 columns which are numerical in data type and one column in Date format. Clearly the data shows value of the variables SPX, GLD, USO, SLV, and EUR/USD against the dates in the date column.

**Information about the data:**

- Data has 9 columns and 2290 rows.
- Calculated counts of each entry from the respective feature.
- Calculated count of unique entries from the features.

**Visualization of Numerical Features:**

- Plotted distribution of continuous features.
- Plotted correlation matrix.

**Splitting of Data:**

Data is split with a test size of 10%.

**Building of Regression Models:**

Random Forest is prepared.
